DINOv2 base + registers · prefixes are measured separately and never reshaped as patches
Raw residual stream · before final LayerNorm
Patches (n=27,380)
CLS (n=20)
Register 1 (n=20)
Register 2 (n=20)
Register 3 (n=20)
Register 4 (n=20)
Token count (log)
Final token L2 norm (log)
Patch distribution and prefix-token means
Patch 10–90%
Patch median
Patch 99th percentile
CLS
